

Derivaciones

$$\mathcal{D}_1 = \frac{\langle y := 1, \sigma_0 \rangle \Rightarrow \sigma_1 [\text{ass}_{\text{sos}}]}{\langle \Gamma_1, \sigma_0 \rangle \Rightarrow \langle \Gamma_2, \sigma_1 \rangle} [\text{comp}_{\text{sos}}^2]$$

Sentencias

$$\begin{aligned}\Gamma_1 &= (y := 1 ; \mathbf{while} \neg (x = 1) \mathbf{do} (y := x \cdot y ; x := x - 1)) \\ \Gamma_2 &= \mathbf{while} \neg (x = 1) \mathbf{do} (y := x \cdot y ; x := x - 1)\end{aligned}$$

Estados

$$\begin{aligned}\sigma_0 &= \{x \mapsto 3\} \\ \sigma_1 &= \{x \mapsto 3, y \mapsto 1\}\end{aligned}$$
